AXI-5100c II Component Counting System

The New Scienscope AXI-5100c II is the most advanced, automated component counting system in the world. This automated system communicates with data management providing complete inventory control by using an inline integrated conveyor system. This system counts components faster than any system on the planet. Save time, save money, reduce labor and avoid the dreaded "line down" scenario due to lack of a components. There are different configurations available ask one of our representatives.
